

# Welcome to ProQuest Dialog™

## Experience the all new ProQuest Dialog service — right now!

*Content from the world's most authoritative publishers, and the tools to search it with speed and precision — ProQuest Dialog is your resource for information to drive innovation.*

Innovation often begins with a problem that needs solving. The first release of ProQuest Dialog enables **scientists** to explore these problems, determine how and by whom they are being addressed, and find new solutions.

We invite you to experience a new definition of precision that exemplifies relevancy, transparency, control, completeness, and trusted content in our new sophisticated, yet easy-to-use service, **ProQuest Dialog**.

## Here are just a few of the new features ProQuest Dialog offers:

- Intuitive interface, providing a radically improved user experience
- Advanced search features, such as *Rank*, built directly into the interface
- Enhanced retrieval through recognition of synonyms, word stems and alternate spellings
- Improved cross-database searching through easy access to thesauri
- Normalized fields to facilitate de-duplication and post-processing
- On-the-fly interface and search result translations
- Left-hand, embedded and right-hand truncation
