The Biomedical and Life Sciences Collection

Over 2,000 audio visual lectures by leading world experts

<https://hstalks.com/biosci/>

Talk-matching service

The Biomedical & Life Sciences Collection provides immediate access to over 2, 000 online seminar-style talks, containing the latest research and developments as well as the fundamentals, presented by many of the world's leading experts.

This prestigious resource is perfect for your research as well as a study or reference tool for students. In fact, each video lecture (or a segment of it) can be easily incorporated into a frontal lecture in class or embedded into virtual learning environments (Blackboard, Moodle etc.). Since we understand that faculty members don't necessarily have the time to go through the Collection and choose the most appropriate lectures for their courses, we offer a **talk-matching service** entirely free of charge.

The service is provided by Dr Iris Margalit which has been working with faculty members at universities worldwide with the aim of tailoring the Collection's content to their particular course. Feel free to e-mail her or to fill the "Send Syllabus" form on the HSTalks website, and she will get back to you with a list of suggested talks and series. In addition, Iris is available for further discussing the Collection and its possibilities for use in teaching and learning.

Lastly, she is looking forward to receiving feedback in order to enable Henry Stewart Talks to shape and adapt the content to meet subscribers' needs.

Iris Margalit, PhD

Scientific Content Consultant
